

Simplify your payroll management

Despite being a major logistical and financial expense, many organisations are unaware of how much payroll processing costs their organisation. At Smartsalary Payroll Solutions, we focus on making complex things simple to reduce the time and cost associated with paying your people.

Here's how.

We make payroll costs transparent

We ensure a fixed cost per payslip with a responsive system that recognises the requirements of each pay cycle. You won't pay a cent more than you need to on payroll.

We'll tailor our solution

Our flexible software adapts to your organisation's needs. So even the most complex employment arrangements can be accommodated, and you'll avoid expensive and time-consuming staff training and IT infrastructure updates.

We know the Australian payroll landscape

Incorrectly interpreting award structure and application can have serious implications. Our extensive experience and deep knowledge has enabled us to develop dependable expertise in the interpretation of Australian government award rates and intricate industry conditions.
